Experience

C++ Training - Lovely Professional University **July 2025**

- Successfully Completed an extensive, hands-on training program delivered by an external industry expert.
- Designed and developed a fully functional Library Management System in C++ managing 500+ books records with persistent data storage using file handling techniques, demonstrating proficiency in OOP principles.
- **Tech Stack:** C++. File Handling, Object-Oriented Programing (OOP)

Projects

TrueRates| Web Project **January 2026**

- Built a unified platform (TrueRates) for tracking real-time Gold, Silver, Currency, and Crypto prices with accurate and user-friendly conversion.
- Designed an interactive web interface and integrated real-time APIs to fetch live global rates, implementing smart converters for currency, metals and crypto.
- Developed a fast, reliable price-tracking system that provides accurate live rates and instant conversions, improving accessibility to global market data
- **Tech Stack**: VS code, JavaScript, HTML, CSS, API's

MetaScan - MataData Analyzer | Cyber tool Project **October 2025**

- Created a lightweight file analysis tool that scans selected folders and extracts metadata such as last modified date for structured monitoring.
- Implemented folder selection, recursive file scanning, and metadata extraction in Python using OS libraries, with automated report generation after initial scan.
- Provided instant visibility of file update history and organized reporting, reducing manual file tracking effort and improving monitoring efficiency.
- **Tech Stack**: Python, SQLite, Hashing, OS module, Date-time module

Fake Document Detection System | Detection Project **June 2025**

- Engineered a Fake Document Detection System to automate authenticity verification using rule-based scoring and polynomial rolling hash techniques
- Integrated keyword analysis, special character evaluation, and numeric pattern detection to compute a 0–100 authenticity score
- Built dynamic visualizations to track accident frequency, geographic locations, and key contributing factors across 2+ years of data and 15+ high-risk zones.
- **Tech Stack**: C++, HTML, CSS, String, Data Visualization

Dream Interpretation Bot | Python programming **September 2024**

- Made a dream interpretation system to help users understand meanings and patterns behind their dreams
- Processed user inputs using Python and NLP techniques to analyze keywords and generate interpretations
- Delivered quick and meaningful dream insights, improving user engagement and demonstrating practical AI application
- **Tech Stack**: Python, NLP, Flask, HTML, CSS, JavaScript

Certifications

ChatGPT 4 Prompt Engineering – Infosys **August 2025**

Computational Theory – Infosys **August 2025**

Master Generative AI and Generative AI tools – Udemy **August 2025**

Technical Skills

Programming Languages: C++, Python, SQL, Java

Cyber Tools: WireShark, Shodan ,Nmap, Recon-NG, FTK Imager, NetCut

Technologies & Frameworks: DBMS, HTML, CSS, Git

Core Competencies: Cybersecurity Fundamentals, Vulnerability Assessment & Penetration Testing (VAPT), Network Security & Threat Analysis, Python Programming, Web Development (HTML, CSS, JavaScript), Secure Application Development, Problem-Solving & Debugging, Git & Version Control, Team Collaboration, Analytical Thinking

Education

Lovely Professional University Punjab **Jalandhar, Punjab**
Bachelor of Technology - Computer Science and Engineering | CGPA- 6.91 *Since 2023*

Shivaji Vidya Peeth, Bhadana **Sonipat, Haryana**
12th with science | Percentage: 75.5 *2022-2023*

Shivaji Vidya Peeth, Bhadana **Sonipat, Haryana**

10th with science |Percentage: 86.8 *2020-2021*
